HOW YOU CAN PLACE AN ORDER WITH US

CONNECT WITH US

ABOUT US:

Fortec Medix Supplies Limited, established in 2009 in Nairobi, Kenya, stands as a premier provider of comprehensive medical equipment solutions across East Africa.

Our core expertise encompasses the supply, installation, and commissioning of state-of-the-art medical equipment, complemented by specialized technical consultancy services. We partner with leading global manufacturers to deliver cutting-edge medical technology to healthcare institutions ranging from individual physician practices to major hospital systems.

As strategic healthcare partners, we serve diverse medical facilities including:

- Hospitals and Medical Centers
- Specialized Clinics and Surgery Centers
- Long-term Care Facilities
- Correctional Healthcare Facilities
- Private Medical Practices

Our commitment to excellence extends beyond equipment provision through:

- Advanced Technical Support Services
- Healthcare Technology Consulting
- Custom Solution Development
- Market Intelligence and Advisory Services

Through rigorous market research and industry analysis, we provide our clients with data-driven recommendations that optimize their investments and enhance operational efficiency. Our dedication to timely delivery and seamless service implementation has established us as a trusted name in healthcare solutions.

At Fortec Medix, we believe that exceptional healthcare delivery begins with reliable equipment and expert support. Our mission is to empower healthcare providers with the tools and knowledge they need to deliver outstanding patient care.

While our forte is in areas of Medical Gases and Accessories, Operating Theatre, Critical Care Equipment, Maternity & New Born Equipment, General Medical Equipments, Hospital Furniture, Engineering consultancy & Design Framework - we offer more than this.

We are privileged to have acquired sole distributorship of some of the best Medical Equipment from the Manufacturers.

Fortec
Medix Supplies Ltd
Extreme Quality in every Dimension

SERVICES WE OFFER:

- Installation, Commissioning & Sale of Medical Equipment and Consumables
- Preventive Maintenance
- Corrective Maintenance
- Technical Consultancy

WHY US?

- Technical backup/support even after the expiry of the warranty period.
- Agreeable payment plan for high value business.
- Reliable, flexible and transparent services.
- Adept team of professionals.
- Competitive and reasonable rates.
- Timely execution and delivery.
- And as our policy states, “Extreme Quality in Every Dimension” is a guarantee to our clients.

MEDICAL GASES

Medical Oxygen Plant - Ozcan Kardelser

Benefits of Generating Your Own Oxygen:

- 24/7 Oxygen generation - adequate supply
- High demand of Oxygen in the country
- Saves resident patient's money spent on Oxygen by providing affordable healthcare
- Leverage Oxygen Plant investment - Sell to other public & private health institutions
- Recovery of your investment cost in 2 years
- Reduced cost of health procedures attracting more patients and revenue in the hospital
- Saves on expensive cost of the cylinders
- Saves on cumbersome logistics costs due to Supply Chain challenges

Support & Maintenance:

We'll ensure full support of the department through:

- Manifold System
- Gas Cylinders
- Oxygen Regulators
- Flow Meters
- Humidifiers
- Pulse Oximeters

Why Our Plants?

- 93/42 EEC CE Certificated
- ISO 10083 standard CE certificated
- World largest hospital references
- 150 Hospital references
- ISO 13485 CE certificated

Fortec Managing Director Inspecting a Recently Installed 600 LPM Oxygen Plant.

CRITICAL CARE

Dialysis Machine

- OCM (Online Clearance Monitor)
- DIASAFE plus (Dialysis Fluid Filter)
- bibag (Dry Bicarbonate Concentrate)
- Single needle or SN Click-Clack
- ISO-UF program - easy, fast and intuitive handling
- TDMS (Therapy Data Management System)
- BPM (Blood Pressure Monitor)
- CDS (Central Concentrate Delivery System)
- Adapted Flow

Dimensions & Weight: 1370 x 500 x 650 mm (H x W x D) (including shunt interlock and pedestal) approx. 86 kg
Water Supply: Water inlet pressure - 1.5 to 6.0 bar, Water inlet temperature - 5°C to 30°C; for "integrated hot rinse" 85°C to 95°C, Max. drain height: 1 m
Concentrate Supply: Supply pressure - 0 to 100 mbar; 1 m max. suction height, Central supply - 1 central acid concentrate (optional) 0 to 500 mbar

Dialysis Chair

- **Weight Capacity:** 500 lbs.
- **Back Height:** (from floor/seat) 49″/29″
- **Overall Width:** (2 tables down/up) 37″/57″
- **Seat Width:** 27.5″
- **Arm Height:** (from floor, front/back) 30″/27″
- **Seat Height/Depth:** 24″/21″
- **Upright Overall Depth:** (w/handle) 50″
- **Thermoplastic Casters:** 5″

DIALYSIS CENTRE SET-UP BY

FORTEC MEDIX SUPPLIES LTD

CRITICAL CARE

- Multi-parameter Monitoring: Tracks vital signs like ECG, SpO2, NIBP, respiration, temperature, and more.
- Clear Display: Large, high-res touchscreen for easy viewing of patient data.
- Data Management: Stores and reviews patient data, including trends.
- Advanced Alarms: Audible/visual alarms alert clinicians to critical conditions.

Patient Monitor

Macs 20/10/20/30/50

- Precise Flow Rates: Delivers a wide range of flow rates with high accuracy for various infusion therapies.
- Enhanced Safety: Incorporates advanced occlusion detection and alarm systems to prevent fluid backflow and ensure patient safety.
- Reliable Power: Provides extended battery life for uninterrupted operation during power outages.
- User-Friendly Interface: Features a clear and intuitive touchscreen interface for easy programming, monitoring, and operation.

Syringe Pump

SPN 58

- High-performance ventilation for adults, children and newborns
- 02 Therapy - Greater patient comfort and less risk of patient intubations
- Advanced monitoring tools such as capnography and oximetry
- Driving Pressure monitoring
- Advanced communication system - USB, HL7 Protocol and Nursing Call
- Memorization of last 240 hours of ventilation

Ventilator

Fleximag Max

CRITICAL CARE

Defibrillator

Reanibex 800

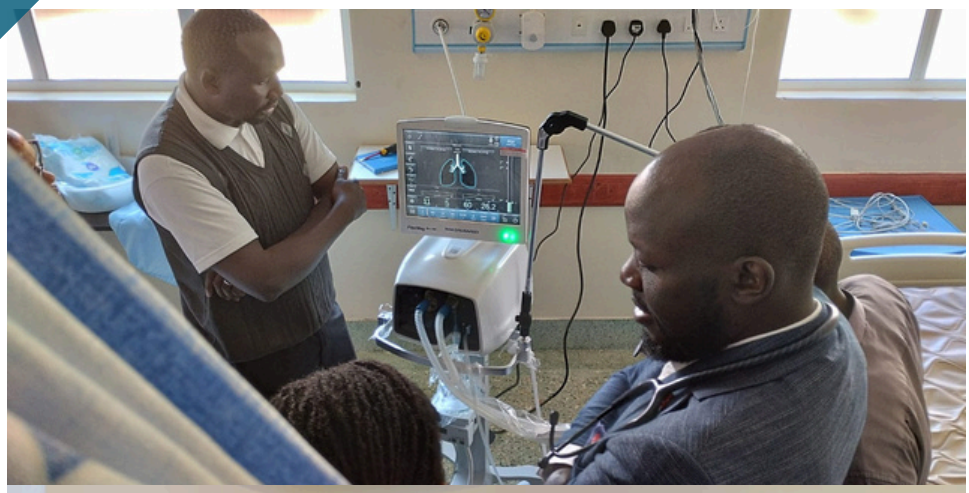

- Biphasic technology
- Large colour display (8.4”)
- 3, 5 or 10 leads patient cable
- Masimo Rainbow SET technology that monitors SpO2, SpCO and SpMet, SpHb,SpOC, PVI (optional)

Infusion Pump

IPN 56

- Precise Flow Rates: Delivers a wide range of flow rates with high accuracy for various infusion therapies.
- Enhanced Safety: Incorporates advanced occlusion detection and alarm systems to prevent fluid backflow and ensure patient safety.
- Reliable Power: Provides extended battery life for uninterrupted operation during power outages.
- User-Friendly Interface: Features a clear and intuitive touchscreen interface for easy programming, monitoring, and operation.

THEATRE

Operation Light

Lumax 25

- Powerful Illumination: Delivers high-intensity LED illumination for optimal surgical visualization with minimal shadows.
- Accurate Color Reproduction: High CRI ensures true-to-life color rendition of tissues for precise surgical procedures.
- Flexible Lighting: Allows for easy adjustment of light field size and intensity to suit various surgical needs and preferences.
- Ergonomic Design: Lightweight and easy to maneuver and position, reducing strain on surgical staff.

Suction Machine

H90

- Robust Design: Sturdy and compact for easy maneuverability and placement.
- Durable Construction: Stainless steel instrument shelf and handles for long-lasting use.
- Safe Collection: 2 x 3.5 liter or 2 x 2 liter polycarbonate jars with overflow safety.
- Infection Control: Safety bottle with bacterial filter to protect the pump from contamination.
- Quiet Operation: Oil-less suction pump ensures quiet and reliable performance.
- Enhanced Control: Optional foot switch for convenient hands-free operation.

Defibrillator

Reanibex 800

- Biphasic technology
- Large colour display (8.4”)
- 3, 5 or 10 leads patient cable
- Masimo Rainbow SET technology that monitors SpO2, SpCO and SpMet, SpHb,SpOC, PVI (optional)

THEATRE

Anaesthesia System

Avacs 50

- Precise Gas Delivery: Electronic gas mixer with digital flowmeters for accurate and controlled gas delivery.
- Intuitive Interface: 12.1” TFT colour touchscreen for easy operation and monitoring.
- Enhanced Safety: Optional anaesthetic gas monitoring for improved patient safety.
- Efficient Heating: Integrated heated absorber module for optimal performance.
- Modular Design: Selectatec® compatible backbar for flexible configuration and customization.
- British Engineering: Designed and built in the UK, ensuring high quality and reliability.

Operating Table

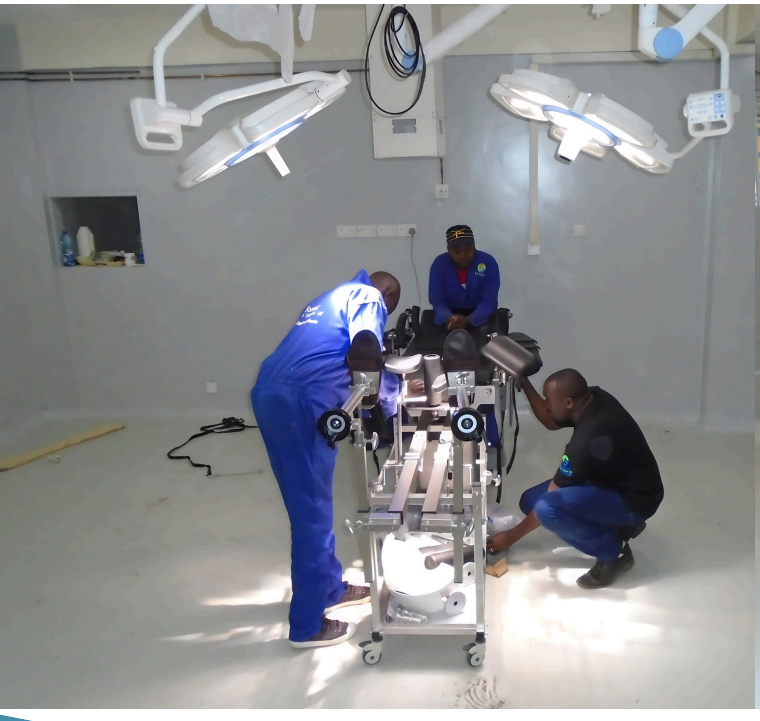

Onex 203/202/201/200

- Basic Positioning: Manual hydraulic system provides standard positioning adjustments with mechanical controls
- Standard Imaging Support: Basic carbon fiber tabletop compatible with standard X-ray procedures
- Essential Positions: Supports fundamental positions including Trendelenburg and reverse Trendelenburg, with manual height adjustment
- Standard Construction: Steel frame construction supports patients up to 150 kg in normal operating conditions

MCH

Infant Radiant Warmer

NWS 101

- Controlled thermal environment with Quartz Heater for uniform warmth
- The low T-shaped base can easily slide under other equipment
- Convenient handles to shift
- Control panel is ergonomically designed with soft touch keys

Delivery Table

DT-100

- Back and leg movements are controlled by 1 DC motor for efficient operation
- Height adjustments (up/down) are managed by a single hydraulic lifting column
- Features 3 essential positions: lithotomy, labor, and flat bed position
- Headboard constructed from high-grade ABS plastic, ensuring durability and easy cleaning
- Quick assembly and disassembly design for improved mobility and maintenance
- Main patient surface divided into 2 sections, upholstered with medical-grade vinyl
- Single-piece fixed side rail on each side, manufactured from ABS plastic with manual locking mechanism
-

Neonatal Resuscitaire

NRC100

- Phototherapy Unit - Yes, LED
- Modes - Pre-Warm, Manual or Automatic
- Oxygen Cylinder - 2PCS*6L
- Tilt Angle of Bed - Electric Inclination

NEONATAL MACHINE SET-UP BY FORTEC MEDIX SUPPLIES LTD

RADIOLOGY & IMAGING

Ultrasound Machine

Sonos 10/12

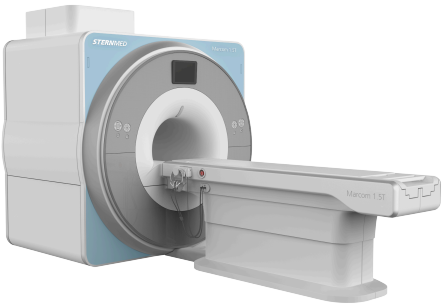

- Standard Resolution Imaging: Basic transducer technology provides clear, reliable image quality suitable for routine diagnostic procedures
- Essential Probe Selection: Compatible with fundamental probe types including convex and linear transducers for basic abdominal and superficial scanning
- Basic Doppler Functions: Features standard color Doppler and pulse wave Doppler for fundamental blood flow assessment
- Simple Control Panel: Traditional keyboard and trackball interface with physical buttons for straightforward operation and common adjustments

X-ray Machine

Xenox DR500

- Analog Film System: Traditional film-based imaging system provides reliable diagnostic images while maintaining cost effectiveness
- Standard Generator: Basic power generator suitable for routine radiographic procedures with standard exposure settings
- Floor-Mounted Design: Fixed positioning system with limited rotation for standard radiographic positions
- Basic Image Processing: Manual exposure controls with fundamental brightness and contrast adjustments during image capture

MRI Scanner

Marcom 1.5T/0.5T/0.35T

- Field Strength: Basic 1.5 Tesla magnet providing standard diagnostic image quality
- Gradient System: Standard gradient performance suitable for routine clinical scanning protocols
- RF System: 8-channel RF system with basic body and head coils for standard imaging procedures
- Image Processing: Standard reconstruction software for conventional MR image processing

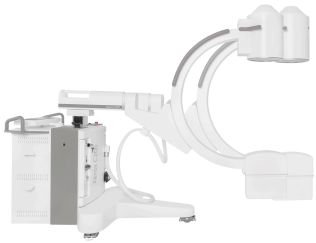

RADIOLOGY & IMAGING

- Grayscale Resolution - 16 bits/pixel source file, 65536 shades of gray
- Plate throuput - 46 plates per hour (upgradable 76 plates per/hour)
- Cassette - Sizes: 14” x 17” (35 x 43 cm), 10” x 12” (25 x 30 cm)
- Weight - 56 lbs (25.4 kg)

CR

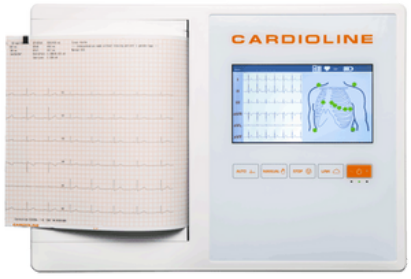

iCRco

- High-Frequency Generator: This technology enables faster image acquisition and reduced patient exposure time.
- Digital Subtraction Angiography (DSA): DSA allows for real-time visualization of blood vessels and other structures by subtracting background images, improving diagnostic accuracy in various procedures.

C-Arm

C 200/400

- Designed to provide simple and fast 12 lead resting ECG acquisition for the private practice
- Particular attention has been dedicated to device usability using a bright 7 inch color touch screen display, as well as dedicated keys for fast operation
- The Rhythm ECG function allows for rhythm analysis of 3 minutes of ECG, including HR trending and Variability
- User is guided through step by step ECG acquisition, from electrode placement, to quality check, acquisition, printing and storage
